DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to multi-layer recording medium with alternating rewritable and pre-pit regions, classified in class 369, subclass 275.3.
 - II. Claims 10-14, drawn to recording apparatus for recording information on a multi-layer recording medium, classified in class 369, subclass 59.25.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the recording apparatus for recording information on a multi-layer rewritable recording medium does not require a recording medium with pre-pit regions having recording marks that lessen a difference between the reflectances of the rewritable and pre-pit regions. The subcombination has separate utility such as storing pre-pit regions with unevenly distributed recording marks.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2652

4. No telephone call was made to request an oral election to the above restriction requirement due to the complexity thereof.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
